

2nd SOCRATES Scientific Meeting 2014

Clinical Translation of Stem Cell Extracellular Vesicles

Aspiration Theatre, Matrix, A*STAR Biopolis Singapore
3 - 4 November 2014

CONGRESS ANNOUNCEMENT:

The Society for Clinical Research and Translation of Extracellular Vesicles Singapore (SOCRATES) will be organising SOCRATES Scientific Meeting 2014 on 3rd-4th November at Matrix, A*STAR Biopolis, Singapore. SOCRATES was started by a group of clinicians and scientists to promote research and translation of extracellular vesicles in Singapore. The main theme of SOCRATES Scientific Meeting 2014 will be Clinical Translation of Stem Cell EV. The sub-themes will be Cell versus EV and Challenges to clinical translation of EV.

The field of Stem Cell-based therapy is slowly but surely undergoing a paradigm shift from cell- to secretion-based mechanism of action. And increasingly, it has been shown that the active therapeutic agent in stem cell secretion is lipid membrane vesicles known as extracellular vesicles (often prematurely or erroneously called exosomes). Despite its relative novelty, academic and industry research activity in the field of stem cell EVs and their therapeutic applications has expanded exponentially over the last few years. There is an urgent need for academic and industry scientists to meet and share their experiences. Through this meeting, SOCRATES hopes to catalyze activity in this field, reduce research redundancy and wastage, and expedite the clinical development of stem cell EV.

SOCRATES would like to invite you to this meeting to share and learn more about this exciting new area of stem cell-derived therapeutic agent.

REGISTRATION & ABSTRACT:

Regular Delegate Pass	SGD \$300
Student	SGD \$150
Group Registration (SOCRATES Member) 10pax	SGD \$2,000
Group Registration (Non-Member) 10pax	SGD \$2,500

We welcome scientific posters and short oral communications presentation on EVs.

SCIENTIFIC PROGRAM:

3rd November 2014- Symposium on Cell Vs. EV

1400- 1800hrs Stem Cell –based Regenerative Medicine: Cell Vs. Ev

4th November 2014- Symposium on challenges to clinical translation of EV

0900-1200hrs Stem Cell EV in Disease Models

1400-1800hrs Stem Cell EV: Isolation, Analysis, Manufacture, Safety and Regulatory Challenges

Visit <http://www.socrates-singapore.org> for registration, latest programs or abstract submission.
